Globaltronix (Bombay) Pvt. Ltd.

The Precision Coil Company

Manufacturers and exporters of

- Coils for Relay, Transformer, Filters, Solenoids, and medical devices
- Open Relay Assembly
- Header Adjustment
- Motor Assembly
- PCB Assembly

Coil Winding, Finishing & Stripping Section

Our Goals

- Diversification of product portfolio.
- Quick Turnaround for Prototype.
- Best in the Market for Quality, Delivery, and Cost Performance.
- World's lowest lead time for relay manufacturing.
- The industry leader in Employee Engagement, Customer Satisfaction, and Environment Protection

Know us better

Globaltronix is a leading manufacturer and exporter of wire-wound precision electronic components with more than 30 years of expertise. Specialist in the production of a wide range of relay coils, air coils toroids, miniature solenoids, transformers, open relays, headers, motors, and complete relay assemblies. We prioritize the needs of our clients and hence customize our products as per their requirements with a timely delivery rate. Our commitment is to the highest quality standards through continuous improvement of the Quality Management System. Globaltronix is an ISO 9001:2015. Certified company.

Why choose us

500+ Highly skilled operators engaged in custom winding of precision component.

A strong infrastructure spanning over **30,000 sq. ft** to manufacture a wide range of products and for expansion of future requirements

Well equipped to build coils with higher reliability which are used in **Heart Pacemaker, Space Satellites with ISRO, Guided Missile Systems, Commercial and Military Aircraft, and Formula 1 cars**

Clean room facilities for special space application coils.

Excellence is not a skill, It's an attitude. Quality is our top business metric. We are persistent in the improving our Manufacturing System through continuous improvement, Lean management, and kaizen up to delivery.

Have **exported over 100 million** products- coils, headers, motors, and open relays to date and counting.

Markets Served

Aerospace

Space

Commercial

Our Products

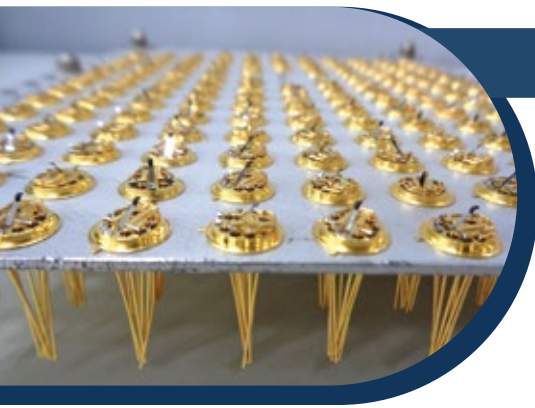

Relay Coils

Wide range of relay coils made to custom specifications and varying design parameters. There are Coils for both AC and DC circuits with voltages ranging from 1 to 230 volts. The implantation of diodes or suppressor networks are done for special applications. We make wide range of T05 coils with 54AWG finding usage in niche applications.

Header Adjustments

Header adjustments are done under 20x magnification to meet the precise Header specifications. Adjustments of the moving and stationary contacts for dielectric spacing and the return spring angle to achieve desired return spring force (Grams). Adjustments of the moving contact preload (grams) as per the limits and welding of diode chips on header assembly. We have adjusted approximately 4.2 million headers in the last 5 years.

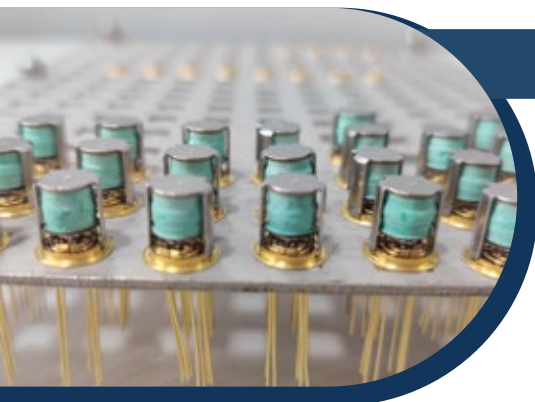

Relay Motor Assembly

Precise armature assembly, welding and motor adjustment are made under 20x magnification with Ultrasonic cleaning and Vacuum baking. Have Built close to 10 million motors.

Relay Assembly

Miniature Relay assemblies are done under magnification to meet Relay Assembly Standards along with DPDT, Latching, and Non-Latching.

Plant Manufacturing Resources

Cleanroom, Vacuum Degassing, Vapor Degreaser, Multispindle Programmable Winders.
